could likely to meet
with some Ice Burgs.
had some tea canby
up and look about &
saw a quantity of large
Ice Burgs all around
getting close to the
ship 3 or 4 with in
a gun shot the largest
about 400 feet long
I should think about
about 80 or 90 ft high
and a lot of small
ones look like a lot
of houses with some
on them, particularly
old, and the sailors

say that it is just as
well to run the single
against a mountain of rocks
as to run against some of
them which we saw one
past a long way off just
just me I found of last
leave with the rocks
up and down, the water
had washed it away
in little Penicles. when
it looks a very nice but
we could smell them
long before we saw them
as it was so cold, could
not see any when I

very comfortable. I then
at 10 pm about 10
it was a long way off
and it was blowing
up the water along
way but in the air
and it looks very nice
just worked a Pocket
handkerchief for
myself. Saw a ship
a long way off
sailing towards us
stopped the steamer
about 12 and had

The depth of water
it was 48 fathoms
gathered up all
the tickets after
dinner a nice bit
of fun with the
Guinness the British
from Spool 119301
at 12 o'clock just
seen the Banks
of New found land
about 50 miles away
and it looked very
nice through the glass
and very interesting
after not seeing land

in so many days it is
covered with snow and
very low in can only
see about 6 Houses &
a light House several
lighting stips about
watched it till I went
to bed. got up ²³

land in the same
line with what I
saw the night before
but we are losing
sight of it now it is
a beautiful morning
the sun shining but
the wind is rather

high and still and
and the sea not so
smooth as yesterday
It is like at
Mill Pool and so
smooth Had my Han
kerchief stole from me
last night. yet eye me
2205 In from port
in sight of land again
and it is covered with
snow and looking
very uninteresting
very cold saw a
little town and
the Church tower

and a lot of little
houses scattered
about several ships
about and the
telegram station
to Quebec just
leaving it now
and going away
from any land just
seen a lot of houses
& granaries. The
sea is just like
a sheet of glass
and the sky is
so clear overhead

and sea around
the bottom just so
look over the sea
and the red shines
and it looks like
just seen the north
over over my right
shoulder as when
front of the ship
the north light
are shining right
going to look about
1 1/2 days to get
up Sunday about
1/2 past it and the

the weather still fine &
the wind a little in evening
cannot see any land
yet the sea is very
smooth and looks
very nice with the
even rising tide
Breakfast went on
deck and saw bars
on both sides and
a large steamer that
left Quebec yesterday
about 10 belonging
to the same Company
and a lot of large
ships making the
land can see
on the shore and the
sun is shining very warm
and it is splashing on
the water now the wind
is not much but it is
to blow what it is trying
to overtake the steamer
that is ahead the sailors
say that it is the steamer
that left the Sunday
